

We rely on a great team!

We are looking for:

Title: Senior Software Developer m/w
Reports to: Chief Technology Officer
Location: Munich, Germany

Starting as soon as possible

Position Summary:

As a part of Cunesoft GmbH's core development team, developing and advancing Cunesoft's Compliance Cloud offerings, the candidate will be responsible for designing, programming and supporting of key customer-facing and internal applications. Depending on the seniority level, the candidate will take a lead position in designing business processes as well as architecting the resulting software module end to end.

The individual should be self-motivated, creative and proactive, to work successfully in a fast-paced environment including diverse technologies, lab as well as cloud environments. The individual will work closely with developers, project managers, engineers and other stakeholders throughout the organization. The individual should have several years of experience developing with Microsoft .NET, ASP.NET MVC and Javascript.

Major Responsibilities:

- Create, enhance and maintain the architecture of the overall solution platform
- Interact with customer's in support cases, during implementation phases and other product related engagements in a professional and solution oriented fashion

- Work and lead very closely with in-house and remote development teams including a team lead / project management role
- Interact with product management, project management and development teams to develop additional modules and functions within the Cunesoft Cloud Platform
- Design and create solutions for pre specified modules and functions
- Use existing tools and techniques to develop and test new and existing work
- Define, create and execute automated test cases, i.e. unit tests
- Participate in troubleshooting and triaging of issues with different teams to drive towards root cause identification and resolution
- Support production deployment of applications and perform "validation testing" during the off-hours maintenance windows
- Support and fix existing and new identified issues by either customers or internal test teams.

Minimum Requirements:

Experience/Skills:

- 5 + years experience designing and developing ASP.Net applications
- Excellent verbal and written communication skills
- 5+ years experience using Microsoft .NET / C#
- Technical background
- Extensive knowledge of Microsoft Visual Studio as well as Microsoft Team Foundation Server
- Previous experience working with Microsoft SQL Server, preferably Microsoft SQL Azure

We rely on a great team!

- Found understanding of Cloud based environments with Microsoft Azure
- Previous experience in the Life sciences area a definite plus
- Understanding and previous experience with GxP and / or 21 Part 11 is a plus
- Must be flexible, independent and self motivated
- Punctual, Regular and consistent attendance

Education:

- BS degree in Information Systems, Computer Science, Web Systems, Electrical Engineering, Mathematics or domain related working experience
