

Advantages:

Save 30-50% in license costs

Reduce maintenance costs

Cut submission time

Cut audit preparation time

- **Plans** regulatory activities/tracks progress for all submissions and products across various countries and/or regions.
- **Produces** electronic regulatory product sheets that provide up to date, comprehensive regulatory summaries on chosen products.
- **Creates** regulatory tasks starting with new submissions through to lifecycle management activities. Initiates tasks at various levels (i.e. management, headquarters). Allows for task delegation to employees in different departments or across affiliates.
- **Generates** alerts when tasks are not finished within agreed timeframes and indicates which are potentially detrimental to submission timelines.
- **Tracks** and archives authority correspondence for all submissions and products within one integrated regulatory content management system.
- **Forecasts** post-marketing submissions that are required and allows for the creation of submission backbones with eCTD module.
- **Publishes** helpful reports with real-time information on the status of registrations, upcoming renewals and agency interactions in various countries and across products. Reports can be generated using a variety of filters from XEVMPD criteria.
- **Facilitates** setting and tracking of KPIs related to regulatory projects.
