Cunesoft continues global expansion – Opening of an US office

Munich, Germany & Princeton, NJ   **7th October 2016**

The Munich based Cunesoft GmbH, in response to growing demand from the Life Sciences industry for its flagship regulatory operations platform and it's content analysis framework, announced the opening of its US operations. Cunesoft is focusing on the life sciences market to offer an alternative to the complex, costly traditional regulatory compliance platforms from giant vendors. Robust functionality, combined with a high degree of flexibility and a simple and intuitive user experience has brought **major savings in TCO of up to 70%,** including internal costs and maintenance.

North American customers can also expect to benefit from Cunesoft's dedication to future proofing technology with regulatory data mining, data mapping and data augmentation. This enables life sciences customer to automate regulatory processes and **reduce manual efforts by 80-90%** compared to currently available technology on the market.

Additionally, the company's strong commitment to a Private Software as a Service (SaaS) delivery model sets it apart from other vendors, as it fast becomes the preferred consumption model for enterprise software platforms in mature markets.

Rainer Schwarz, CEO of Cunesoft, comments, "We have a rapidly growing list of customers from around the world and the potential to dramatically expand our presence in the North American marketplace. We are proud of our innovative solutions and are confident that we can bring a new level of innovation to customers, ultimately helping to make regulatory compliance easier for our life sciences clients. With a ready team on the ground – lead by Jim Nichols as our Vice President of Life Sciences for North America – we will be able to develop a user community to attract new customers and prospects, including the expansion of new services to existing customers."

According to Jim Nichols, "As a longtime enthusiast and innovator for regulatory compliance platforms, I know that Cunesoft is precisely what the US market needs – simplicity, flexibility and cost-effectiveness, all on a single platform. I am confident that together, we can expand Cunesoft's presence and better serve the North American market."

About Cunesoft:
Cunesoft GmbH is a provider of regulatory management software and services for all segments within the life sciences industry. Solutions include management of eCTD, xEVMPD, IDMP data and document management as well as regulatory information management (RIM). Software provisioning is provided as Software as a Service (SaaS).
