

We rely on a great team!

We are looking for:

Title: Quality Control Lead m/f
Reports to: Development Manager
Location: India, Bangalore
Starting as soon as possible

Position Summary:

The Cunesoft team is looking for exceptional individuals with experience in software quality control and testing (Manual and Automation testing). The position is a mix of hands on quality control execution and managing a small team. The knowledge of compliance software within life science regulations such as GxP and or FDA 21 CFR Part 11 is required.

Come join a growing team where you will have the opportunity to use technologies, tools and processes that positively change how our customers work with enterprise applications - making them more engaging, collaborative and interactive.

Major Responsibilities:

- Establish and evolve formal QC processes, ensuring that the team is using industry-accepted best practices.
- Oversee all aspects of quality assurance including establishing metrics, applying industry best practices, policies and standard operating procedures and developing new tools and processes to ensure quality goals are met.
- Act as key point of contact for all QC aspects of releases, providing QC services and coordinating QC resources internally and externally.
- Lead and mentor QC team members.
- Develop and execute test cases, scripts, plans and procedures (manual and automated).

- Responsible for assuring that output from the software development process includes adequate identification and interpretation of product requirements, such as
 - a) traceability requirements
 - b) test requirements
 - c) usability, etc.
- Review product design documentation to ensure that requirements stated are correct, unambiguous, and verifiable.
- Assist in generation of use cases to ensure that all functional requirements of a system are captured during the product design phase.

Experience/Skills:

- Bachelor's degree in engineering, science or information technology, or equivalent education and work experience.
- 6-9 years of related work experience in Software Quality Control.
- Compliance regulation knowledge such as GxP, FDA 21 CFR Part 11, Annex 11
- Experience in Life science domain (Regulatory Management) would be preferred.
- Strong leadership, communication and management skills.
- Self-starter, highly organized; Works well with all functional levels in the organization; Excellent presentation and interpersonal skills; high level of business management and facilitation skill; Customer focused; Building Team Spirit; Problem Solving; Ethics & Values.
