

We rely on a great team!

We are looking for:

Title: UX Developer m/f
Reports to: Development Manager
Location: Bangalore, India

Starting as soon as possible

Position Summary:

We are looking for a UI Developer who is motivated to combine the art of design with the art of programming. Responsibilities will include translation of the UI/UX design wireframes to actual code that will produce visual elements of the application and bridge the gap between graphical design and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.

Major Responsibilities:

- Develop new user-facing features, client-side applications.
- Build reusable components and libraries.
- Ensure the technical feasibility of UI/UX designs.
- Optimize application for maximum speed and scalability.
- Collaborate with other team members.
- Strong ability to work on multiple projects simultaneously.

Experience/Skills:

- Bachelor's degree in engineering, science or information technology, or equivalent education.
- Experience of 3-4 years in designing rich enterprise web applications.
- Proficient understanding of web mark-up, including HTML,CSS.
- Proficient understanding of JavaScript, TypeScript, frameworks like jQuery, Kendo, Bootstrap
- Client side code debugging.
- In depth understanding of Chrome developer tools , Firebug and similar tools.
- Basic knowledge of image authoring tools, to be able to crop, resize, or perform small adjustments on images.
